

\$DAW – Devs Are Working

Whitepaper V1.0

1. INTRODUCTION

Meme tokens are a huge part of crypto culture, but they often suffer from one major issue: rug pulls. When a token fails, the developers are often the first ones blamed. But what if the developers never sell? What if they remain completely transparent and let the community take full control?

\$DAW (Devs Are Working) is a social experiment designed to answer these questions. We're testing whether a meme token can succeed when developers are fully transparent and do not sell their tokens.

In \$DAW, the developers' wallets are public, and they will not sell any tokens. The power is entirely in the hands of the community. This is your opportunity to be part of something groundbreaking. Let's find out together.

2. TOKENOMICS

Total Supply: 1,000,000,000 \$DAW

Distribution:

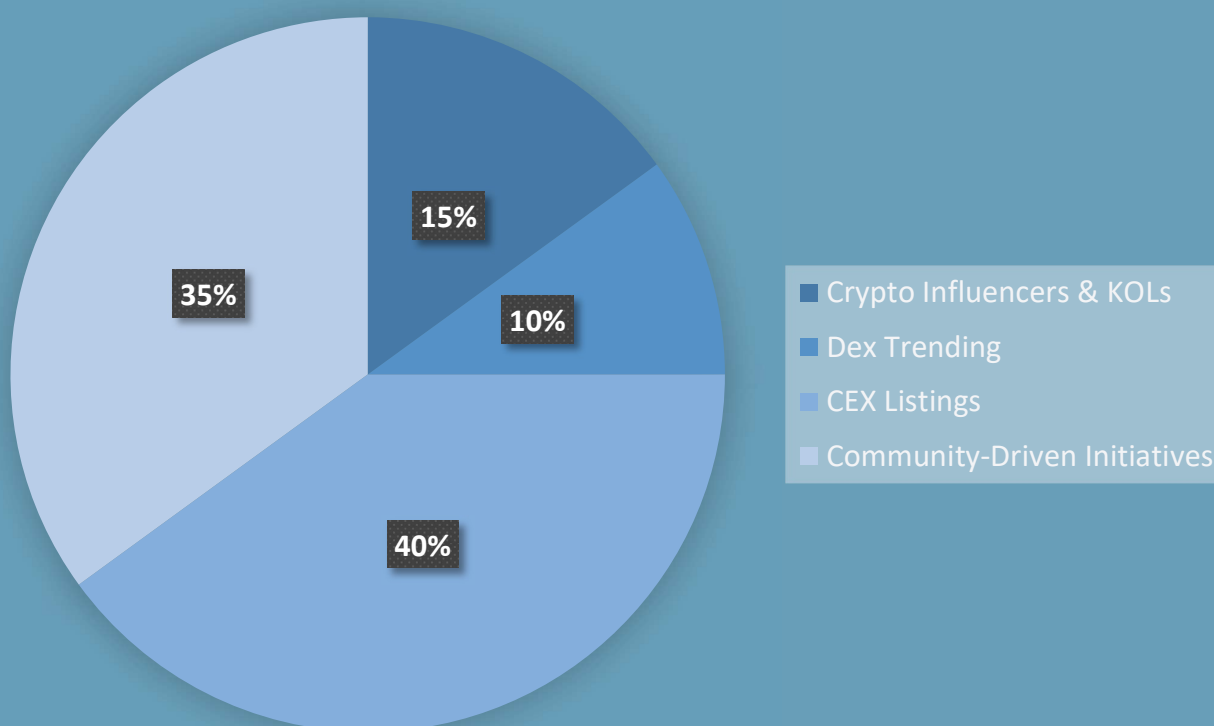

- **Fair Launch:** No pre-sales or private allocations—everyone gets an equal opportunity from the start.
- **0% Team Allocation:** Team will buy just like the rest of the community, eliminating the risk of a rug pull.

- **100% LP Burned:** All liquidity provided during launch will be permanently burned, ensuring a secure and fair-trading environment.

Marketing Wallet Allocation:

- **15% Crypto Influencers & KOLs:** Collaborations with top crypto influencers to drive awareness.
- **10% Dex Trending:** Funds allocated to increase \$DAW's visibility on DEX.
- **40% CEX Listings:** A significant portion will go towards listing \$DAW on CEX(s).
- **35% Community-Driven Initiatives:** The community will vote on how to allocate these funds.

3. UTILITY

\$DAW isn't just another meme token—it's a movement with a real purpose. Here's what sets it apart:

A Real Social Experiment

\$DAW is testing whether transparency can reshape the fate of meme tokens. By making developer wallets public and preventing them from selling, we're setting a new standard for trust in crypto.

Community-Driven Growth

Unlike other projects, \$DAW is fully controlled by its community. There are no secret dumps, artificial hype, or behind-the-scenes manipulations—just organic growth driven by holders.

Restoring Trust in Meme Tokens

Meme tokens should be fun but also fair. \$DAW proves that transparency and memes can coexist, bringing honesty back to the space.

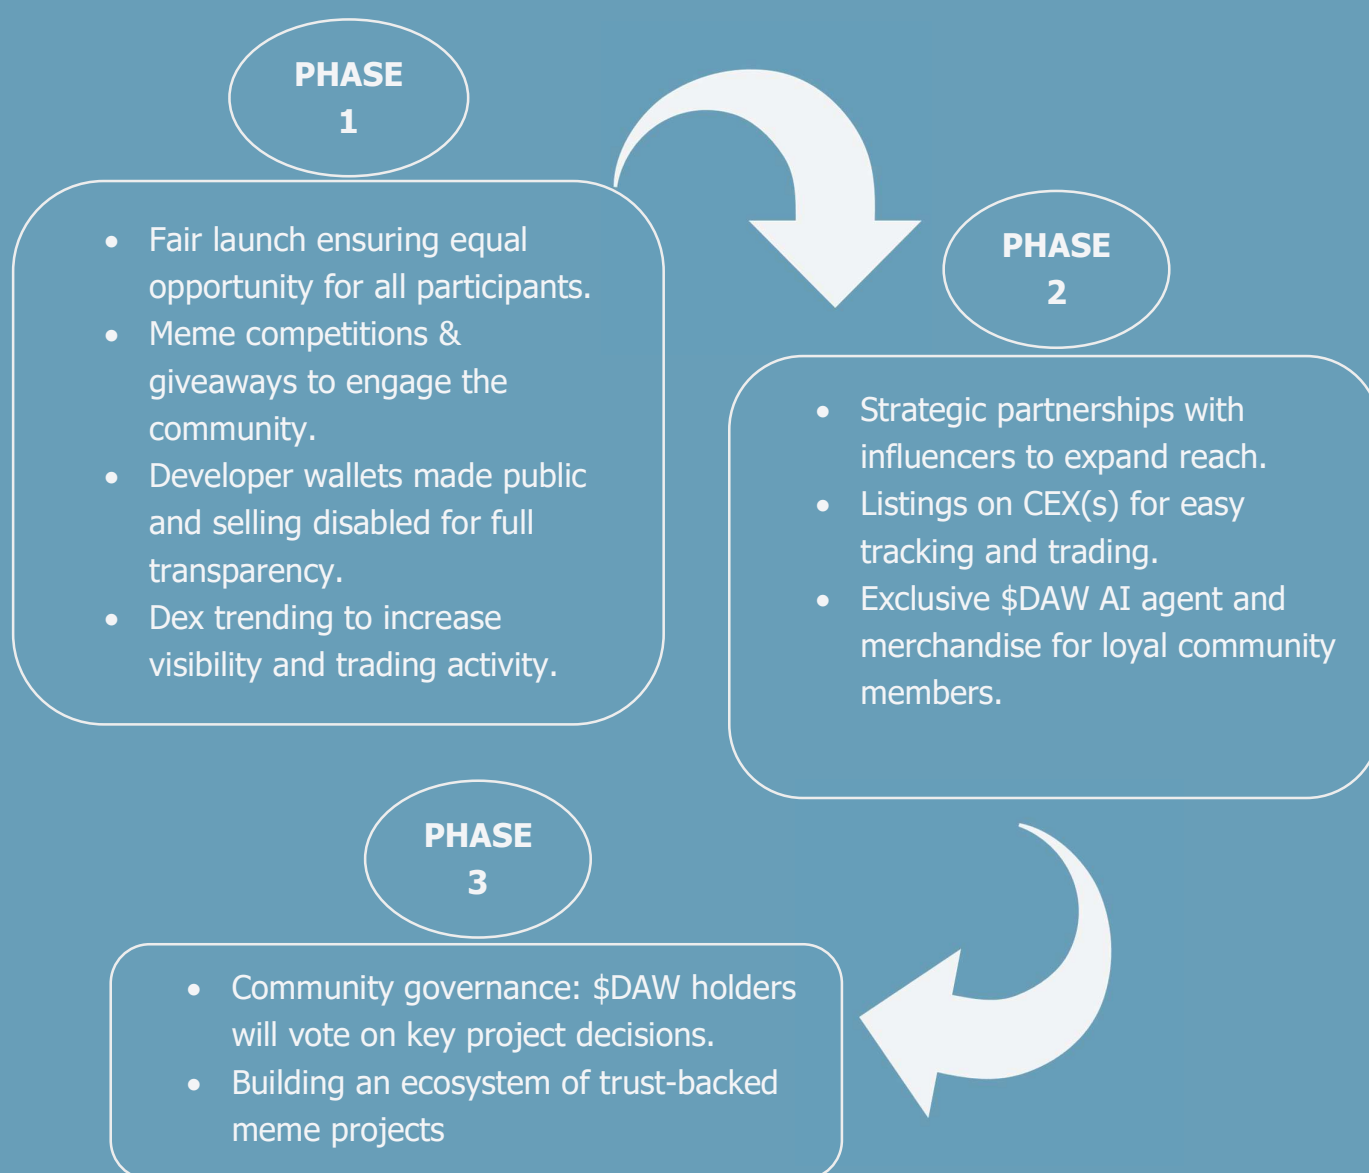

4. MARKET ANALYSIS

The meme token market is massive but plagued by scams and rug pulls. Investors are frustrated with dishonest projects. \$DAW aims to change that narrative.

Our target audience includes crypto enthusiasts who seek innovative projects but also value transparency and fairness. By focusing on community control and developer accountability, \$DAW has the potential to stand out in a crowded market.

5. ROADMAP

6. THE TEAM

The \$DAW team is committed to proving that not all developers are the same. While many projects have suffered from rug pulls, we're doing the opposite.

Our developers are fully transparent, with public wallets and no plans to sell. This is a social experiment in trust, and we're excited to see where it leads. By being open and honest, we aim to restore faith in the crypto community.

7. RISK FACTORS

- **Market Volatility:** Crypto markets are highly volatile, and prices can change rapidly.
- **Regulatory Risks:** Changes in crypto regulations could impact the project.
- **Community Trust:** The success of \$DAW depends on the strength of its community.

Only invest what you can afford to lose.

8. LEGAL AND COMPLIANCE

\$DAW is a community-driven project that prioritizes transparency and fairness. While we follow all applicable regulations, participants should stay informed about local laws.

9. COMMUNITY

The \$DAW community is the core of this project. We're building a movement based on transparency, trust, and fun. Join us:

- 📠 Telegram: <https://t.me/DEVsAreWorking>
- 🐦 X (Twitter): @DAW_on_SOL
- 🌐 Website: DAW.MEME

10. DISCLAIMER

All utilities and listings are directly tied to the token's value. As the token value increases, the marketing wallet's value also grows, providing a direct correlation between token performance and marketing power. \$DAW is a meme token designed for entertainment and experimentation. This is not financial advice. Always **DYOR (Do Your Own Research)** before investing.

11. SUMMARY

\$DAW is more than just a meme token—it's a bold social experiment in trust and transparency. By putting power in the hands of the community and keeping developers accountable, we're challenging the norms of the crypto world.

This is your chance to be part of something bigger. Join us on this journey and help prove that meme tokens can be fun, fair, and trustworthy.
